HTML is the language for creating web pages. Today, HTML isn't just for professional web designers anymore. Anyone who needs to present or publish something on the Internet needs to master HTML. Teachers who need to put assignments online need HTML. Managers who want to find new employees advertise on their corporate websites. They too need HTML. Job seekers wishing to get an edge by publishing their profiles on the Web definitely need to master HTML. Almost everyone needs HTML skills nowadays. Fortunately, HTML is easy. You don't need a 1000 page book to learn HTML. You can do it quickly with this book. It explains how to create HTML documents, provides practical examples and teaches basic techniques to style plain documents and turn them to good looking web pages.
